- Partners and Recognized Products

The following is a list of all partners and products recognized under the DfE Formulator Program. DfE commends these companies for their leadership in designing products that are good for their business and for the environment.

A note on private-labeling and licensees: Partners may custom label a DfE-recognized product for another company, provided that the formulation remains identical to the recognized formulation. Similarly, DfE extends recognition to the products of Partner company licensees, provided that the Partner retains full legal control of the product formulation. Partners must inform DfE in advance of any private labeling or licensing activities that involve the use of DfE recognition. An asterisk appears before private-labeled and licensee products.
